INTERESTS

I'm interested in learning about and tackling hard problems by analyzing, designing, building and evaluating software systems. My current research focuses on building secure systems.

EDUCATION

Ph.D. Candidate co-advised by Peter Druschel & Deepak Garg 2010 – 2019
Max Planck Institute for Software Systems, Saarbruecken, Germany

Ph.D. Candidate mentored by Holger Hermanns 2009 – 2010
Saarland University, Graduate School, Saarbruecken, Germany

Bachelor of Science in Applied Computer Science 2006 – 2009
Baden-Württemberg Cooperative State University Stuttgart (DHBW Stuttgart) with IBM Germany
Thesis: "Distributed Complex Query Processing for Informix Dynamic Server"
GPA: 1.5 (scale 1.0 to 5.0), First Class, Top 10%

SKILLS

C, Java, Distributed & Storage & Operating Systems, Secure System Design, Trusted Computing, SSD/Flash Memory, Linux, Memory Isolation

ACADEMIC HIGHLIGHTS

Ph.D. Candidate advised by Peter Druschel & Deepak Garg 2010 – Present

ERIM: Secure, Efficient in-process isolation with Memory Protection keys [USENIX Security'19]

Isolating sensitive state and data can increase the security and robustness of many applications. Examples include protecting cryptographic keys against exploits like OpenSSL's Heartbleed bug or protecting a language runtime from native libraries written in unsafe languages. ERIM, a novel technique that provides hardware-enforced isolation with low overhead on x86 CPUs, even at high switching rates.

Guardat: Enforcing data policies at the storage layer [EuroSys'15]

In today's systems, policies protecting stored data and mechanisms for their enforcement are spread across many software components, increasing the risk of violation due to bugs, vulnerabilities and misconfigurations. Using Guardat, users, developers and administrators specify file protection policies declaratively, concisely and separate from code, and Guardat enforces these policies by mediating I/O in the storage layer.

INDUSTRIAL EXPERIENCE

Research Scientist at Intel Labs April'19 – now
Intel Labs, Hillsboro, OR

Research and improve security technologies. Build prototypes and provide guidance to their technology transfer. Current focus lies in building secure, accountable machine learning training and Function-as-a-Service prototypes, and memory protection techniques.

Research Software Engineering Intern Summer 2014
Microsoft Research, Redmond, WA

Research opportunities to overcome performance and flexibility issues with Trusted Platform Modules (TPM) using Intel's new Software Guard Extension (SGX). Build and evaluate a prototype implementation. Mentor: Ronald Aigner (Principal Research Engineer)

Software Engineering Intern/Bachelor Thesis 2006 - 2009
IBM, Boeblingen, Germany & Austin, Texas, USA

Analyzed, designed and implemented prototypes. From optimizing distributed queries in Informix Dynamic Servers (IDS) to providing new programming models for heterogeneous processor architectures like the Cell/BE.

PUBLICATIONS

ERIM: Secure, Efficient In-process Isolation with Memory Protection Keys
Anjo Vahldiek-Oberwagner, Eslam Elnikety, Nuno O. Duarte, Michael Sammler, Peter Druschel, Deepak Garg
Usenix Security 2019

Techniques to Protect Confidentiality and Integrity of Persistent and In-Memory Data
Anjo Vahldiek-Oberwagner
PhD Thesis 2019

PESOS: Policy Enhanced Secure Object Store
Robert Krahn, Bohdan Trach, Anjo Vahldiek-Oberwagner, Thomas Knauth, Pramod Bhatotia, Christof Fetzer
ACM EuroSys 2018

Light-Weight Contexts: An OS Abstraction for Safety and Performance
James Litton, Anjo Vahldiek-Oberwagner, Eslam Elnikety, Deepak Garg, Bobby Bhattacharjee, Peter Druschel
Usenix OSDI 2016

Thoth: Comprehensive Policy Compliance in Data Retrieval Systems
Eslam Elnikety, Aastha Mehta, Anjo Vahldiek-Oberwagner, Deepak Garg, Peter Druschel
Usenix Security 2016

Guardat: Enforcing data policies at the storage layer
Anjo Vahldiek-Oberwagner, Eslam Elnikety, Aastha Mehta, Peter Druschel, Deepak Garg, Rodrigo Rodrigues, Johannes Gehrke, Ansley Post
ACM EuroSys 2015

Protecting Data Integrity with Storage Leases
Anjo Vahldiek, Eslam Elnikety, Ansley Post, Peter Druschel, Rodrigo Rodrigues
Technical Report 2011-08, MPI-SWS, 2011 & **granted patent**

A Verified Dependable Wireless Safety Critical Hard Real-Time Design
Hernan Baro Graf, Holger Hermanns, Juhi Kulshrestha, Jens Peter, Anjo Vahldiek, Aravind Vasudevan
IEEE WoWMoM 2011

Evaluation of an Optimization for Object Tracking – Feedback-Based Head-Tracking
Anjo Vahldiek, Ansgar Schneider, Stefan Schubert, Dirk Reichard
Fifth Annual Meeting on Information Technology and Computer Science of the Baden-Wuerttemberg Cooperative State University, 2009

WIP/POSTERS

Thoth: Efficiently enforcing data confidentiality and integrity in large-scale distributed data processing systems
Eslam Elnikety, Anjo Vahldiek, Aastha Mehta, Deepak Garg, Peter Druschel
ACM SOSP'13 Work in progress

Trusted Storage
Anjo Vahldiek, Eslam Elnikety, Ansley Post, Peter Druschel, Deepak Garg, Johannes Gehrke, Rodrigo Rodrigues
Usenix FAST'12 Work in progress

Teaching	TA for Distributed Systems	Winter 2014
	TA for Operating Systems	Summer 2011
Honors & Awards	Max Planck Society, PhD Scholarship	2010 - 2016
	Saarland University, Graduate School PhD Scholarship	2009
	IBM International Internship Scholarship	2007
Recent Activities	SOSP Artifact Evaluation	2019
	External reviewer EuroSys	2018
	External reviewer HotOS	2017

External reviewer OSDI	2016
Co-Develop WelcomeHelp.de Refugee Volunteer Tool	2015
Student Admission Volunteer MPI-SWS	2012
General Student Meeting Coordinator MPI-SWS	2010
